- Ukrainian - Native
- Russian - Native

### SUMMARY

Junior Front-End Developer with expertise in HTML5, CSS3, JavaScript, and React.

I create modern, user-friendly web solutions and continuously improve my skills. Quick to adapt, solve challenges effectively, and collaborate in teams.

A fast learner, always eager to master new technologies. Strong analytical thinking and troubleshooting abilities. Currently learning Node.js and React Native to enhance my full-stack and mobile development skills.

### PROJECT EXPERIENCE

- Call of Victory [GitHub](#) *Team Project*  
[HTML, CSS(SASS), JS]

The website for the game Call of Victory features a responsive design, Swiper for interactive sliders, and smooth animations for an engaging user experience.

**Role: Developer**

- Contact Manager [GitHub](#) *Individual Project*  
[React, Redux, REST API]

The website has user authentication, contact management, a theme switcher, and responsive design.

- Image search [GitHub](#) *Individual Project*  
[React, TypeScript, REST API]

- Portfolio [GitHub](#) *Team Project*  
[HTML, CSS, JS, REST API]

The website adapts to different devices, features a theme switcher, and uses Swiper.js for interactivity. It connects to a backend for dynamic data.

**Role: Developer**

- Contact Manager - Backend [GitHub](#) *Individual Project*  
[Node.js, Express.js, MongoDB, Swagger]
